

AUDIOCONEXUS

captivate your audience

CREATIVE DEVELOPMENT

AudioConexus works with a gifted pool of researchers, writers, voice talents, actors, producers, and sound engineers. We bring your tours to life by writing and producing engaging narratives and dialogues, creating exceptional (location-relevant) entertainment experiences for your guests.

Your visitors are immersed in breathtaking stories, set against backdrops of stunning sound effects and vibrant musical scores.

Then we help your venue by creating audio trailers (promotional audio segments) for your tours in multiple languages, empowering your sales and marketing staff to distribute audio through multiple channels including the Web, trade shows, product sales, and travel trade sales missions.

Hand-held Audio Guide

AudioConexus is changing the way people experience audio tours by providing visitors with entertaining and educational experiences, taking them further and deeper into the tour experience than ever before.

The AudioConexus hand-held Audio Guide is part of an easy-to-use, technically advanced and scalable audio interpretation system. This hand-held audio player features CD-quality audio sound, two stereo earphone jacks and 1 hidden speaker, ideal for two listeners sharing one device!

The audio guides are scalable to 32 languages, with each language supporting 950 audio files! These lightweight audio guides are designed for the best possible visitor experience, providing visitors' with an optional social experience using the speaker or a more intimate inclusive experience using headsets.
